**Functionality in Emergency Situations
for Voice and Broadband Services**

Back-Up Power:

Corn Belt Telephone has a 75,000 watt fixed propane back-up generator that is capable of being converted to gas if needed. This unit is of sufficient size to run all central office equipment. Battery backup time is eight hours minimum. Outside plant is a 100% FTTH with no DLC, AFC or remote modules requiring AC power. All subscriber connections have ONT battery power supplies. Corn Belt has a number of these battery units on chargers ready for service. They also have several charging units attached to the fix generator for recharging during long power outages. Corn Belt has seven portable generators of various sizes available for emergency situations.

Rerouting of Traffic around Damaged Facilities:

With FTTH both broadband and voice traffic is delivered over the same connection to subscriber locations. There is only one Central Office with redundant electronic connection for intercarrier connection.

Traffic Spikes:

Our Meta Central Office switch can handle full wired line access. Trunk routing is limited to sixty three toll calls during any single period of time. There is 680 lines active in the Wall Lake exchange. There is a significant amount of unused voice capacity in the Central Office switch. Broadband capacity is capable of 4 times the normal day usage with redundant routing available.
